Basic Stucture of an HTML document

`<!DOCTYPE html>`

Declares to the Browser that the file is an HTML document.

`</html>`

The root element of an HTML Page, it contains both both information for the browser and content to be displayed.

`<head>`

The head contains information that is not displayed in the visible content of the page.

`<title>Your Title</title>`

The title contains the title of your page to be displayed in the browser title bar.

`</head>`

`<body>`

The body contains the visible content to be displayed on your page.

`<h1>Your Content</h1>`

An example of visual content, the h1 element is discussed further in lesson 3

`</body>`

`<html>`
